Hyper-**N**etwork for **e**lectro**Mo**bility

NeMo Stakeholder Forum Conference & Training session

October 12, 2017 ║ Stuttgart, Germany

Invitation

Athens, 21 July 2017

Dear Sir/madam,

The NeMo project consortium is cordially invite you to its 1st Stakeholder Forum Conference that will take place on **Thursday, 12 October 2017 at IBM premises in Ehningen** (near Stuttgart). The Conference will take place following on from the International Electric Vehicle Symposium and Trade Fair (EVS30) to be held from 9 to 11 October 2017.

NeMo (http://nemo-emobility.eu) is a 3-year EU funded project (grant agreement no 713794), involving 19 partners from 8 European Countries, that aims to make Electromobility more attractive by deploying a "*hyper-network*" of services to address the issues which currently slow down the shift to electric vehicle use. It is developing a network with a distributed environment with open architecture based on standardised interfaces. This hyper-network, together with an Open Cloud Marketplace, will facilitate interoperable ICT services for electric vehicle users such as integrated billing and roaming across Europe.

We invite key experts and stakeholders in the area of Electromobility to learn more about the developments made in the first year of this 3-year project, and specifically the:

- Steps taken for building an Electromobility Hyper-Network with basic aim to increase interoperability of services for electric vehicles across Europe;
- Solutions proposed for an Open European Inter-Roaming Protocol, which will allow Electromobility roaming platforms to connect to each other.

Conference participants will have the chance to liaise with project participants and other Electromobility experts, actively contribute to the discussions and provide their valuable feedback in order for NeMo developments to meet the needs of all involved

stakeholders i.e. users, service providers, industry, infrastructure operators and public authorities.

A break-out training session focusing on Interoperable Electromobility Services will be held in parallel to the Conference's technical presentations. This will be the first of a series of NeMo training activities, to be organised during the project's lifetime, with basic aim to familiarise interested app developers, researchers and PhD students with the NeMo Service development environments and Hyper-Network. Training events will also provide them with all necessary information and tools for their potential participation at the NeMo Hackathon that is planned towards project's end. Learn more at: http://nemo-emobility.eu/nemo-training-session-interoperable-electromobility-services/

No participation fees are foreseen for both events but your registration is mandatory. Please reserve your participation either for the Stakeholder Conference or the Training Session (not both) through the following link: http://nemo-emobility.eu/nemo-stakeholder-forum-conference/# by **September 29, 2017 the latest.**

Additional information about the venue as well as the draft agenda are available at: http://nemo-emobility.eu/nemo-stakeholder-forum-conference/#

Save the Date and register to the NeMo Stakeholder Forum Conference and Training Session. We will be more than happy to welcome you in Stuttgart on October 12, 2017.

Yours faithfully,

Dr. Angelos Amditis

NeMo project Coordinator

Institute of Communication and Computer Systems
